VIAGGIO A ITALIA

iPhone chronicles of a mother-daughter duo's adventures in Northern Italy.

What does traveling do
to me? For me?

So often, I over identify with the idiosyncrasies and flaws that mark me. I tend to tighten the overly cautious skin that's already quite limiting. But traveling invites me to take risks. It forces me outside of my own skin and to speak, eat, act, look, and listen in a completely different way. It's a plunge into fresh air that's both challenging and reviving. It alerts my eyes to the many little differences that make up the grand diversity of doing life, while making me very grateful for how deeply our shared humanity reaches.
